

.NET Software Engineer

The job

As an experienced C# .NET Software Engineer, you are responsible for defining, designing, developing and reviewing our projects/products. You will work closely with your project managers, fellow developers and the QA team to ensure that the team delivers consistently high quality solutions. The job can be from 0,8 to 1 FTE.

The profile

- Minimum of 4 years of experience.
- Good command of written and spoken Dutch and English.
- A self-motivating team player with good communication and interpersonal skills.
- A team player who is able to acquire knowledge independently and share with the team.
- Experience in writing a requirements and design document.
- Experienced in Object Oriented Design and Object Oriented Programming.
- Experienced in UML.
- Experienced in developing with C# .NET 3.5 or higher (ASP.NET and WinForms).
- Knowledge of MS SQL Server 2008 (T-SQL).
- Knowledge of Team Foundation Server.
- Knowledge of Entity Framework, MVC, WCF, and WPF.
- Knowledge of Agile processes.
- Knowledge of Test Driven Design/Development.
- Basic knowledge about (automotive) electronics would be a plus.

The company

Quipment is a trendsetting company when it comes to optimizing business processes with state of the art IT solutions for the taxi and logistic business. These solutions are mainly focused on planning and control processes and consist of software and board computers.

Besides this, Quipment offers also professional services like consultancy, project management, installations and implementations.

Quipment headquarters are in the Netherlands (Nijmegen). Quipment has a 100% owned subsidiary in India that is responsible for software development, system administration and customer support. The Dutch R&D team consists of project managers and developers. You will work closely together with the other team members in the Netherlands, 7 in total. The organization is informal and horizontal organized with short lines of communication. In India, we are growing rapidly and that team consists of 70 people in which about 30 will be closely working for our Dutch projects. For more details, visit our website www.quipment.nl

Information and application
